SUMMARY

I graduated from SMK Wikrama Bogor majoring in Software and Game Development (PPLG) with internship experience as a Front-End Developer and Full Stack Developer. I have skills in web application development using React.js, Laravel, Node.js, and PostgreSQL, and am familiar with building RESTful APIs and responsive interfaces. I understand the implementation of clean code, version control using Git, database integration, and team collaboration in software development. I have a high enthusiasm for learning, able to adapt to new technologies, and ready to contribute as a software developer in a professional environment.

EXPERIENCE

Front End Developer (Intern) - PT Daun Biru Engineering

Jan 2025 - Jun 2025

- Developed a water quality monitoring system website that displays real-time sensor data.
- Implemented data visualization using Visual Monita to graph water quality conditions.
- Created a responsive, real-time UI dashboard for water condition analysis.

Full Stack Developer (Intern) - PT Baru Transformasi Indonesia

Feb 2026 - Jun 2026

- Developing an integrated commodity business operational management platform that includes production management (BOM), land inventory, accounting, and a portal for investors to monitor ROI (Return on Investment) in real-time.

EDUCATION

SMK Wikrama Bogor

2023-2026 (Lulus)

- Jurusan Pengembangan Perangkat lunak & Gim (PPLG)

SKILL

Front End :

- HTML5, CSS3, JavaScript ES6+, React.js, Tailwind CSS, Bootstrap, Responsive Design, REST API Integration

Tools :

- Git, GitHub, VS Code, Postman, Figma, Docker, Notion

Mobile Developer :

- Dart, Flutter

Back End :

- Laravel, Node.js, Express.js, CI4
- RESTful API
- MySQL, PostgreSQL

CERTIFICATE

- **Dicoding:**
 - Belajar Back-End Pemula Dengan Javascript,
 - Belajar Dasar Pemrograman Javascript,
 - Belajar Prinsip Pemrograman SOLID,
 - Belajar Membuat Front-End untuk Pemula.
 - Belajar Membuat Aplikasi Web dengan React

PROJECT

Mesin Kasir:

Tech Stack: Laravel, Mysql, Git, Bootstrap

- A system for managing purchasing data and cashier transactions that helps the recording and reporting process become more efficient.

Aplikasi Apotek:

Tech Stack: Laravel, Mysql, Git, Bootstrap

- Application for managing drug, stock and customer data, thus simplifying administration and inventory control processes.

Aplikasi Slicing UI Ticket (Flutter):

Tech Stack: Flutter

- Converting app design from Figma to mobile view using Flutter with responsive UI results and meeting UI/UX standards.

SNK-APP (Enterprise Resource Planning & Investor Portal):

Tech Stack: React.js, Tailwind CSS, Laravel (PHP), RESTful API, PostgreSQL, Docker, Git.

- Investor portfolio dashboard with data visualization, GPS-based land management, inventory control, and automated financial reporting.
